EDUCATION

Sri Krishna College of Engineering and Technology

Bachelor of Technology in Artificial Intelligence and Data Science | CGPA - 8.4

Coimbatore, Tamilnadu

2020 – 2024

Srm Public School CBSE

HSC 12th | Percentage - 74%

Thuraiyur, Tamilnadu

2019 – 2020

SBK International School CBSE

SSLC 10th | Percentage - 63%

Aruppukottai, Tamilnadu

2017 – 2018

SKILLS

Languages : Java, Python, R, SQL

Tools : Tableau, MySQLWorkbench, MongoDB Compass, R Studio, Tableau, Power BI

Knowledge : Object Oriented Programming, Business Intelligence, Data Science, Machine Learning

Soft Skills : Communication, Team worker, Adaptability, Problem Solving, Task Management, Leadership

EXPERIENCE

Data Science Trainee: (May 2024-Sep 2024)|Meta scifor technologies

Project 1: A Deep image classifier System Using CNN- A Deep Image Classifier System using Convolutional Neural Networks (CNNs) is designed to automatically categorize images by learning and identifying key features like edges and textures.

Project 2: Build a LLM Chatbot Using Google Gemini-PRO- A large language model (LLM) chatbot using Google Gemini-PRO, which leverages advanced natural language processing to understand and respond to user queries.

Project 3: Fitness Tracking system Using Machine Learning- A Fitness tracking system using machine learning to monitor and analyze users' physical activities. The system will predict fitness trends, provide personalized workout recommendations, and track progress over time.

ACADEMIC PROJECTS

Multiple Disease Prediction - A multiple disease prediction system using machine learning is a application of artificial intelligence and data analysis that can predict the likelihood of an individual developing various diseases based on their medical history

A multimodal Approach harnessing ai to expose digital deceptions - A Deep learning model which predicts and expose the deceptions using by ai with ai itself. It predicts the real and fake information, news and identity of individual.

Hotel Management System With Food ordering System - A hotel management system with a food order system via a web a application is a digital tool that helps hotels efficiently manage their operations.

ACHIEVEMENTS & PARTICIPATION

Participated in cognizant Intern Engage program, 2024

Solved 100+ problems in leetcode

CERTIFICATIONS

AWS Academy : Cloud Master class, ML Foundation

Microsoft : Introduction to Power BI, Microsoft data analytics

Infosys : Python SpringBoard, Data Visualization using Tableau

Google : Machine Learning, Cloud computing

Coursera : Python for everybody

Udemy : Data, data science everywhere

Cognizant : Exploratory data analysis

NPTEL : Ethics in Engineering and Stress Management, Developing soft skills and personality
