PERSONAL SUMMARY

Innovative and results-driven software developer with experience in frontend and backend technologies, including React.js, Node.js, Python Flask, JAVA and MySQL. Strong problem-solving skills with a keen interest in integrating ML models into web applications. Dedicated to building efficient, user-friendly, and scalable solutions that align with modern technological advancements.

EDUCATION

- 2023 – 2025** ○ Master of Computer Application (On going)
Bharathiar University, Coimbatore.
- 2020 – 2023** ○ Bachelor of Computer Applications.
Srimad Andavan Arts and Science College.

SKILLS

Web Development:

- HTML, CSS, JavaScript.
- React.js, Node.js.

Backend Languages and Database:

- Java, Python, PHP.
- MySQL, MongoDB.

Tools & Platforms:

- Git, Git hub.
- Postman.
- VS Code.

Frameworks:

- Flask.

Soft Skills:

- Problem-Solving
- Team Collaboration
- Time Management
- Adaptability
- Communication Skills

CERTIFICATIONS

- **Programming in Core JAVA** – T4TEQ Software Solutions, *May 2023*
- **DBMS** – NPTEL (Swayam)
- **UI/UX Designing** – Great Learning
- **Power BI** – Coursera

AREA OF INTEREST

- **Web Application Development (Full Stack)** – Building scalable and interactive web applications.
- **React.js Development** – Creating dynamic, responsive and single page applications.
- **Java Development** – Developing backend systems using Java.

WORK EXPERIENCE

Full Stack Developer Intern – *UNISOFT TECH SOLUTIONS*

- Developing **dynamic web applications** using **HTML, CSS, JAVA SCRIPT, React.js** for frontend and **PHP, PYTHON FLASK** for backend.
- Working with **MySQL** for database management and ensuring data security.
- Handling **bug fixes and performance optimizations** for existing applications.
- Gaining exposure to **deployment and hosting** of applications on cloud platforms.
- Working on both frontend and backend functionalities for scalable applications.

PROJECTS

1. Personal Voice Assistant

Developed a rule-based voice assistant using Python to automate desktop tasks and improve productivity. The assistant integrates speech recognition and text-to-speech to execute voice commands like opening applications, performing web searches, and setting reminders. It serves as a hands-free assistant, making daily operations more efficient.

2. University Sports Management System with Rule-Based Recommendations

Designed a sports management portal using PHP that allows administrators to post sports updates while providing an intelligent recommendation system for students. The system automatically suggests relevant posts based on user preferences and sends email notifications to keep students informed. This enhances engagement and simplifies communication within the university sports community.

3. Attendance System with Face Tracking

Developed a face recognition-based attendance system using Flask and OpenCV, replacing traditional attendance methods with a secure and automated solution. The system captures real-time facial data, ensuring accurate and tamper-proof attendance marking. This technology improves efficiency in schools and workplaces by eliminating manual attendance tracking.
